

1. A disposable nonwoven cleansing mitt adapted to fit on a user's hand, said mitt comprising:
 - (a) first and second nonwoven sheet members in an overlying relationship, said members defining an interior volume for receiving said user's hand, each of said first and second nonwoven sheet members including an exterior surface, having an opposing interior surface, a top edge, a bottom edge opposing said top edge, and first and second opposed side edges, said first and second nonwoven sheet members being permanently secured to each other along the periphery of said top edge and both of said first and second opposed side edges, with at least a portion of said bottom edges being unsecured so as to provide a substantial access opening to said interior volume for readily inserting said user's hand therein, and a retaining aid in association with said interior surface of at least one of said first and second sheet members; and
 - (b) a personal care composition, said wherein at least one of said first and second sheet members releasably carries said personal care composition.
2. A disposable nonwoven cleansing mitt according to Claim 1, wherein said retaining aid comprises a polyolefin film.
3. A disposable nonwoven cleansing mitt adapted to fit on a user's hand, said mitt comprising:
 - (a) first and second nonwoven sheet members in an overlying relationship, said members defining an interior volume for receiving said user's hand, each of said first and second nonwoven sheet members including an exterior surface, having an opposing interior surface, a top edge, a bottom edge opposing said top edge, and first and second opposed side edges, said first and second nonwoven sheet members being permanently secured to each other along the periphery of said top edge and both of said first and second opposed side edges, with at least of portion of said bottom edges being unsecured so as to provide a substantial access opening to said interior volume for readily inserting said user's hand therein, and a polyolefin film attached to said interior surface of at least one of said first and second sheet members; and
 - (b) a personal care composition, wherein at least one of said first and second sheet members releasably carries said personal care composition.

4. A disposable cleansing mitt according to Claim 3, wherein mitt has a length between 100mm and about 200mm and a width between about 80mm and about 125mm.
5. A disposable cleansing mitt according to Claim 3, wherein said first nonwoven sheet member releasably contains said personal care composition and comprises a nonwoven high loft batting material having a basis weight of from about 50 gsm to about 80 gsm.
6. A disposable nonwoven cleansing mitt according to Claim 3, wherein said first nonwoven sheet member releasably carries said personal care composition and comprises a first nonwoven C-folded around a nonwoven high loft batting material.
7. A disposable cleansing mitt according to Claim 2, wherein said polyolefin film is a film comprising polymers selected from the group consisting of a polyethylene, polypropylene and mixtures thereof.
8. A disposable cleansing mitt according to Claim 7, wherein said polyolefin film is a linear low-density polyethylene film.
9. A disposable cleansing mitt according to Claim 3, wherein said personal care composition comprises a surface active agent and optionally an adjuvant, wherein said surface active agent is selected from the group consisting of anionic surfactants, cationic surfactants, amphoteric surfactants, nonionic surfactants, zwitterionic surfactants and mixtures thereof.
10. A disposable cleansing mitt according to Claim 9, wherein said adjuvant is selected from the group consisting of enzymes, fragrances, pigments, essential oils, skin sensates, preservatives, conditioners, hair conditioners, carriers, dyes, antimicrobial agents, antioxidants, binders, buffering agents, chelating agents, solvents, film formers, humectants, glycerin, aloe vera, pantothenic acid, allantoin, bisabolol, dipotassium glycyrrhizinate, skin treating agents, binders, thickeners, hydrocolloids, vitamins and mixtures thereof.

11. A disposable cleansing mitt according to Claim 2, wherein one of said first and second sheet member contains printed matter on its said exterior surface.
12. A disposable nonwoven cleansing mitt according to Claim 3, wherein each of said first and second nonwoven sheet member independently comprise fibers selected from the group consisting of natural fibers, synthetic fibers and combinations thereof.
13. A disposable nonwoven cleansing mitt according to Claim 12, wherein each of said first and second nonwoven sheet member independently comprise fibers selected from the group consisting of rayon, polypropylene, cellulose, polyesters, and mixtures thereof.
14. An article of commerce comprising:
 - (A) container, said container housing;
 - (B) at least one disposable nonwoven cleansing mitt according to Claim 3.
15. A disposable nonwoven cleansing mitt adapted to fit on a child's hand, said mitt comprising:
 - (a) first and second nonwoven sheet members in an overlying relationship, said members defining an interior volume for receiving said child's hand, each of said first and second nonwoven sheet members including an exterior surface, having an opposing interior surface, a top edge, a bottom edge opposing said top edge, and first and second opposed side edges, said first and second nonwoven sheet members being permanently secured to each other along the periphery of said top edge and both of said first and second opposed side edges, with said bottom edges being unsecured so as to provide a substantial access opening to said interior volume for readily inserting said child's hand therein, and a polyethylene film attached to said interior surface of at least one of said first and second sheet members; and
 - (b) a personal care composition, wherein at least one of said first and second sheet members is releasably carrying said personal care composition.
16. A disposable cleansing mitt according to Claim 15, wherein said polyolefin film is a linear low-density polyethylene film.

17. A disposable nonwoven cleansing mitt according to Claim 15, wherein each of said first and second nonwoven sheet member independently comprise fibers selected from the group consisting of rayon, polypropylene, cellulose, polyesters, and mixtures thereof.
18. A disposable nonwoven cleansing mitt according to Claim 15, wherein said first nonwoven sheet member is releasably carrying said personal care composition and comprises a nonwoven C-folded around a nonwoven high loft batting material.
19. A disposable cleansing mitt according to Claim 15, wherein said personal care composition comprises a surface active agent and optionally an adjuvant, wherein said surface active agent is selected from the group consisting of anionic surfactants, cationic surfactants, amphoteric surfactants, nonionic surfactants, zwitterionic surfactants and mixtures thereof.
20. An article of commerce comprising:
 - (A) container, said container housing;
 - (B) at least one disposable nonwoven cleansing mitt according to Claim 15.
